

2014 Company Capabilities

Excellence through Precision

Kansan Machinery Co. Ltd. is one of the founding architects of wet wipe industry technologies in the world, established in 1992. Over the years of nonstop innovation, Kansan has built a solid technological and commercial know how by executing remarkable projects both domestic and abroad, in more than 40 countries. As industry dynamics are constantly shifting, Kansan transforms its solutions in accordance with the trends of the market and provides tailor made solutions to its clients in the need. Kansan's professional team's first priority is to help their clients reach their business targets and to ensure their satisfaction to the fullest, within the budget and the time frame they set. Therefore, Kansan R&D team strives to create more innovative and efficient methods every day. Client focused approach, constant research & development and advanced technology applications make Kansan a reliable long term business partner for those who consider absolute success and profitability as their only options.

Core Values

Kansan believes in high responsibility towards its natural and social surroundings as both are essential elements of sustainability. Accordingly, Kansan is committed to act ecologically considerate in every step of its operations and processes. That is, due to the common sense Kansan invests into the importance of sustainability. With all of its stakeholders, Kansan maintains a trust based relationship and mutual understanding. In the mindset of a dynamic and constantly learning organization, we encourage our employees to take initiative and participate in decision making process at all stages. Our administrative policies are flexible, enabling continuous improvement and provision of ultimate technology in the wet wipe industry.

Quality Policy

For Kansan, quality is a comprehensive concept that covers all stages ranging from material selection to after sales customer service. The main strength of Kansan is its ability to offer state of the art technologies. We work with trend setting component suppliers, each and every one of them are leaders in their domain, in order to create machines with cutting edge technology. We are aiming to meet our clients' present and future business needs with our following quality criteria:

- Innovatively distinctive
- Ambition for technology and development
- On time delivery
- Rapid and effective customer service, both during and after sales

What Kansan Offers

Kansan provides complete and compact wet wipe system solutions; in addition to interfold and cross fold wet wipe converting machines, we also manufacture wet wipe packaging machines and lid applicators. As an internationally proven integrated wet wipe production line manufacturer, Kansan offers:

- Efficiency and high speed
- Fully automatic and flexible operations
- Less manpower and product waste
- Less maintenance
- Easy and quick change-over
- Advanced level of safety and hygiene

2014 and beyond

In order to comply with ever increasing level of demand and business, Kansan moved to a new facility in early 2014. Located on 10.000 sqm of land, 8.000 sqm of which is covered, Kansan started to realize its new projects in this new location. The new corporate logo represents the mainframe of its new corporate identity. Kansan participated in INDEX 14 with three machines and received high level of attention resulting in many attempts for new projects, with both existing and new clients.
